About us

Technotex is a trusted supplier of technical textiles and industrial textile solutions. We support customers in a wide range of industries with products that combine durability, safety, and consistent performance.

Our assortment is focused on textiles for demanding applications where quality and reliability are essential. Every product is selected with attention to technical specifications, practical usability, and long term performance in real working conditions.

At Technotex, we believe strong results start with understanding our customers. We work closely with partners and manufacturers to provide solutions that match both technical requirements and operational needs. Our experience allows us to think practically and act efficiently.

Reliability, clear communication, and continuity are central to how we work. We aim to build lasting relationships by delivering dependable products and a professional service that customers can count on. Technotex stands for technical textiles that perform when it matters most.

Technotex operates in house production facilities in the Netherlands, allowing full control over quality, consistency, and delivery times. By producing locally, we can respond quickly to customer requirements and maintain high production standards. Our experienced team works with modern equipment to ensure reliable and repeatable results. This approach enables flexibility while keeping quality and service at the highest level.

Our expertises

Page 4-7

Lifting

Technotex offers webbing slings, polyester and HMPE round slings, and corner protection. Designed for a wide range of lifting applications, they provide reliable solutions for standard and specialized needs.

Page 8-15

Lashing

Our lashing program includes regular lashings, one way lashing, and load securing and protection products. These solutions ensure stable and safe cargo handling.

Page 16-23

Other

Beside our textile program we also have various other products. Here you can find Gunnebo, Kito, shackles, lifting points and height safety.

Webbing slings

Technotex offers a complete range of high quality webbing slings designed for safe and efficient lifting operations. The program includes MC two layer slings, TDQ four layer slings with a working load limit up to 45 tons, MCEE one layer endless slings, MCED two layer endless slings, and MCDD and MCDSS webbing slings with triangles. All webbing slings are manufactured to meet strict quality standards and are suitable for intensive industrial use.

The range provides reliable solutions for a wide variety of lifting applications.

Polyester round slings

Technotex supplies a comprehensive range of polyester round slings suitable for a wide variety of lifting applications. The range includes TE single layer sleeve round slings with a working load limit from 1 ton to 50 tons, DT double layer sleeve round slings from 1 ton up to 10 tons, and TLX Techlon premium sleeve round slings with a working load limit from 1 ton up to 300 tons.

Each type has its own specific design and capabilities, allowing you to choose the most suitable solution for your lifting needs.

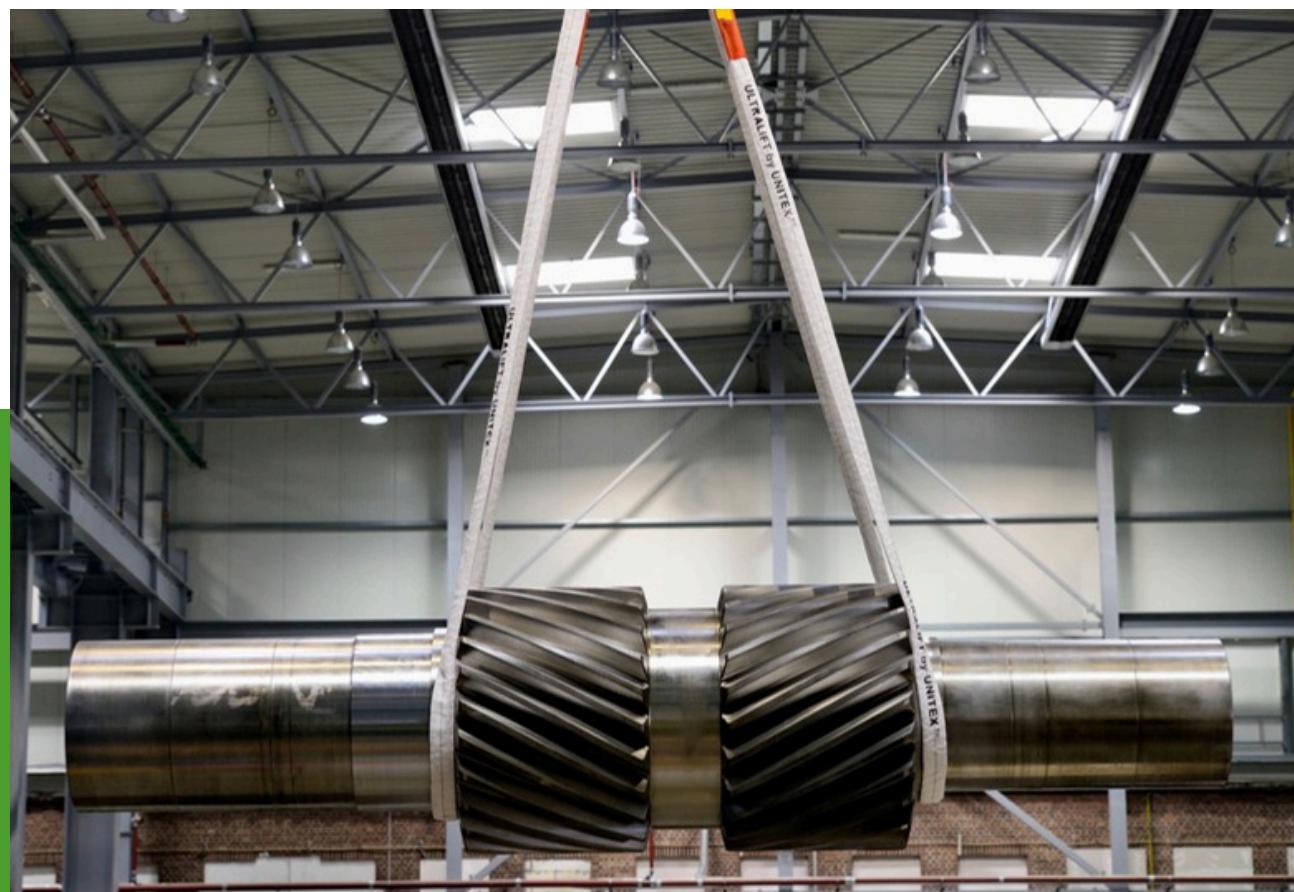

Ultralift

Technotex was the first company to produce round slings from HMPE and has over 20 years of experience in this field. Our program includes T-Core, a hybrid with a polyester sleeve and HMPE core, T-Force, featuring a HMPE sleeve and HMPE core, and ULLD, our premium HMPE sleeve and core sling.

New additions Grizzly and Cobra in both polyester and HMPE with highly compact sleeves for specialized applications.

Each sling is developed to meet specific lifting requirements and customer needs.

Ultraprotect

Technotex offers UltraProtect corner protection for both round slings and webbing slings. Made from durable HMPE, our standard UltraProtect provides reliable reinforcement in demanding lifting operations.

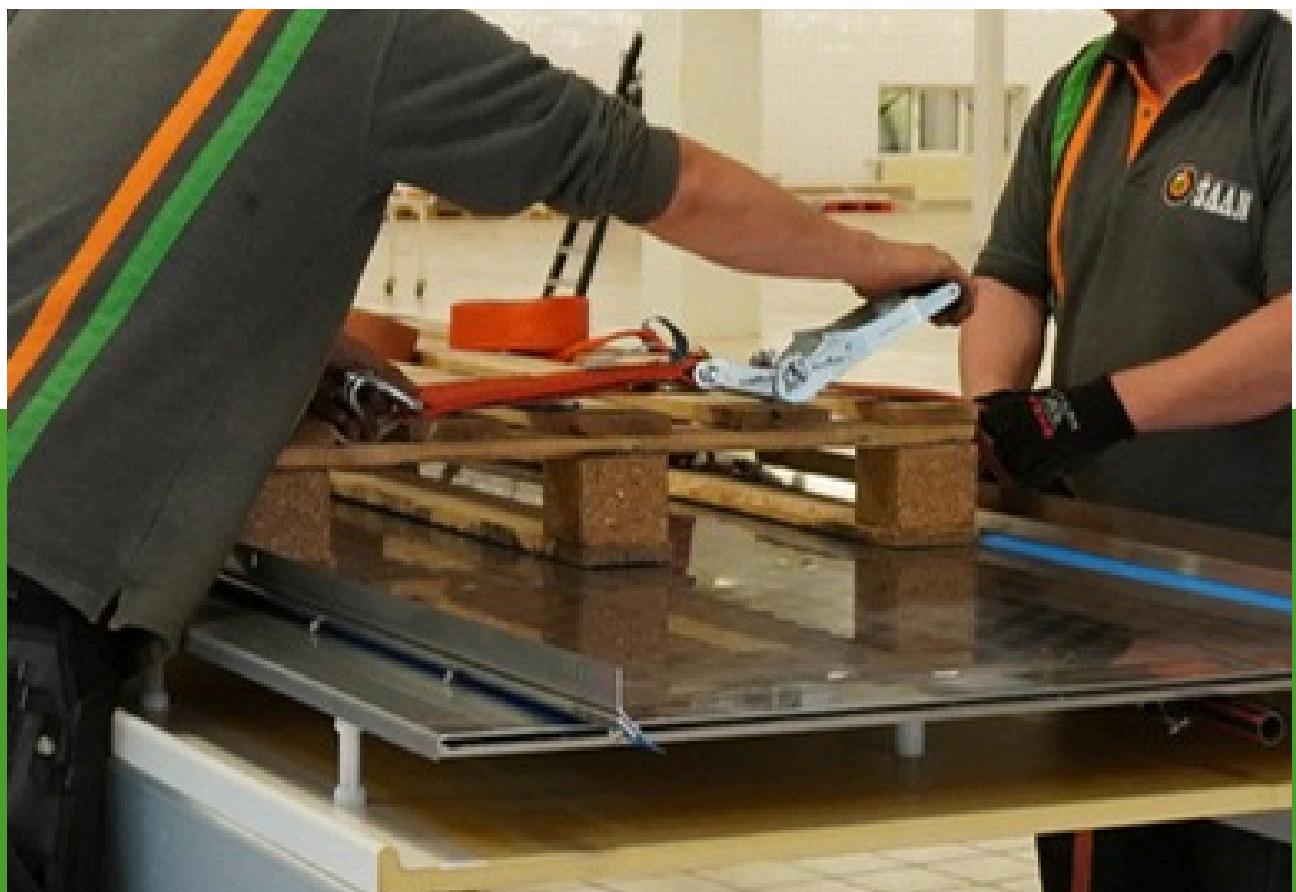

For the heaviest applications, our Heavy Duty UltraProtect uses the strongest material we have ever tested, ensuring maximum protection and durability.

Lashing

Technotex supplies a full range of lashings for securing loads during transport and storage. The range is available in 25, 35, 50, and 75 millimeter widths and can be supplied in various colours, with different types of hardware and ratchets.

The lashings can be configured to suit a wide range of applications and load requirements. Printing with text or logos is available on request for identification and branding purposes.

One-way lashing

Technotex supplies one way lashing webbing for safe and efficient load securing during transport. The webbing is designed for single use applications where reliability and controlled performance are essential. On request, the webbing can be supplied with printed text and logos for clear identification and branding. Special elongation characteristics can also be produced to meet specific customer requirements. The webbing is available in various widths and strengths to suit different loads and transport conditions. Consistent quality and controlled production ensure dependable performance in practical use.

One-way buckles

Technotex supplies a range of one way lashing buckles designed for safe and reliable load securing. The buckles are available in different designs and strengths to match various types of one way lashing webbing. Correct compatibility between buckle and webbing is essential for proper performance.

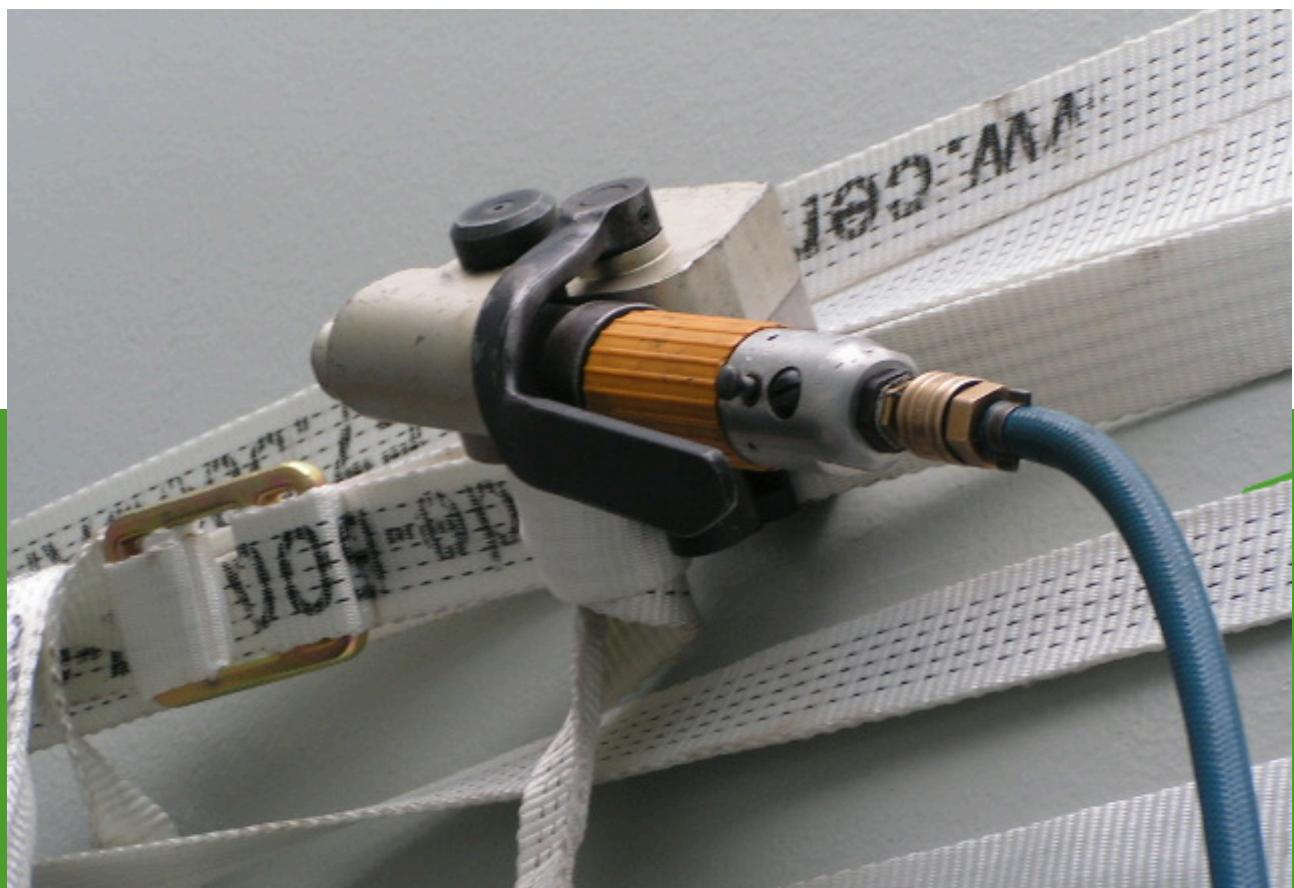

Detailed datasheets are available on our website www.technotex.nl, where the correct buckle for each type of webbing can be clearly identified.

Tensioners

Technotex supplies a range of tensioners for efficient and controlled load securing. Both manual and pneumatic tensioners are available to suit different applications and working conditions. Selecting the correct tensioner in combination with the appropriate webbing is essential for safe use.

Detailed datasheets are available on our website www.technotex.nl, providing clear information on webbing compatibility for each tensioner type.

Strapping

Technotex offers a complete range of strapping for secure and reliable load bundling. Both composite and hotmelt strapping are available to suit different applications and load requirements. Our strapping is designed for consistent performance, durability, and safe handling.

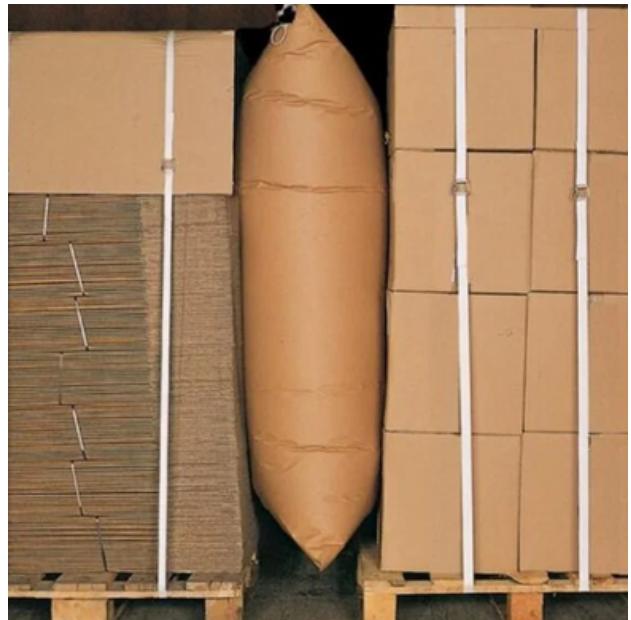

On request, strapping can be supplied in various widths and strengths to match specific needs.

Dunnage bags

Technotex supplies a range of dunnage bags for safe and secure load stabilization during transport. Our bags are available in kraft paper and polywoven materials and come in multiple strength levels to suit different loads and transport conditions. Both regular valves and side valves are available for easy inflation and secure use.

Dunnage bags provide a practical solution to prevent shifting, protect cargo, and improve transport safety.

Anti-slip

Technotex offers anti-slip solutions in both mats and rolls to improve cargo safety during transport. Anti-slip mats prevent cargo from shifting by increasing friction between the load and the vehicle floor. This enhances stability and reduces the risk of damage or accidents caused by load movement.

Our anti-slip products are available in various sizes and thicknesses to suit different cargo types and transport conditions.

Edge protection

Technotex offers edge protectors to safeguard strapping and increase safety during load securing. By preventing damage and wear, edge protectors also help extend the lifespan of the strapping.

Our edge protectors are available in various sizes to suit different loads and applications.

Gunnebo

Technotex is a proud partner of Gunnebo, giving us access to their complete range of lifting and load securing products. This partnership allows us to offer high-quality solutions across all applications, combining our expertise with Gunnebo's trusted products. Customers benefit from the reliability, performance, and comprehensive selection that this collaboration provides.

Through this partnership, we can supply both standard and specialized Gunnebo products quickly and efficiently.

Kito

Technotex is an official partner of Kito, giving us access to their full range of high-quality hoists and lifting equipment. This allows us to offer reliable solutions for a wide variety of lifting applications, combining our expertise with Kito's proven products.

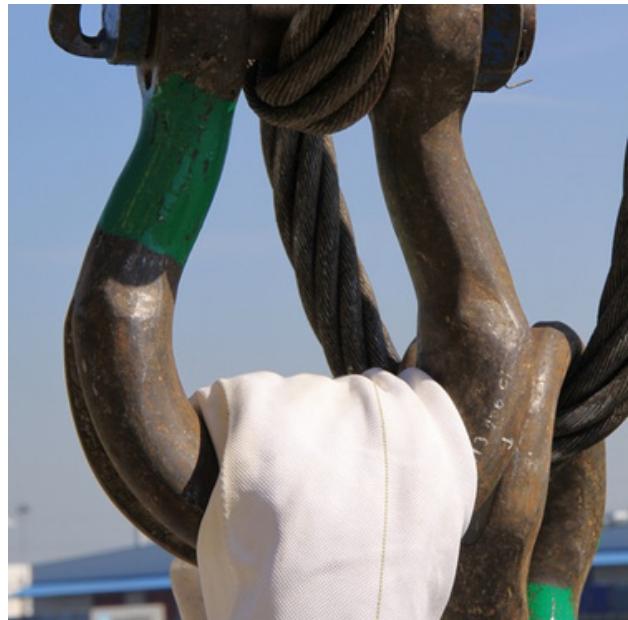

Customers benefit from durable, efficient, and safe lifting solutions backed by Kito's trusted reputation. We can supply both standard and specialized Kito hoists quickly and efficiently.

Shackles

Technotex supplies high-quality shackles from GreenPin, with Crosby shackles available on request. Our range provides safe and reliable solutions for a variety of lifting and load securing applications. Customers benefit from the strength, durability, and trusted performance of these premium brands. Our team can advise on the right shackle for each application, ensuring optimal safety and efficiency.

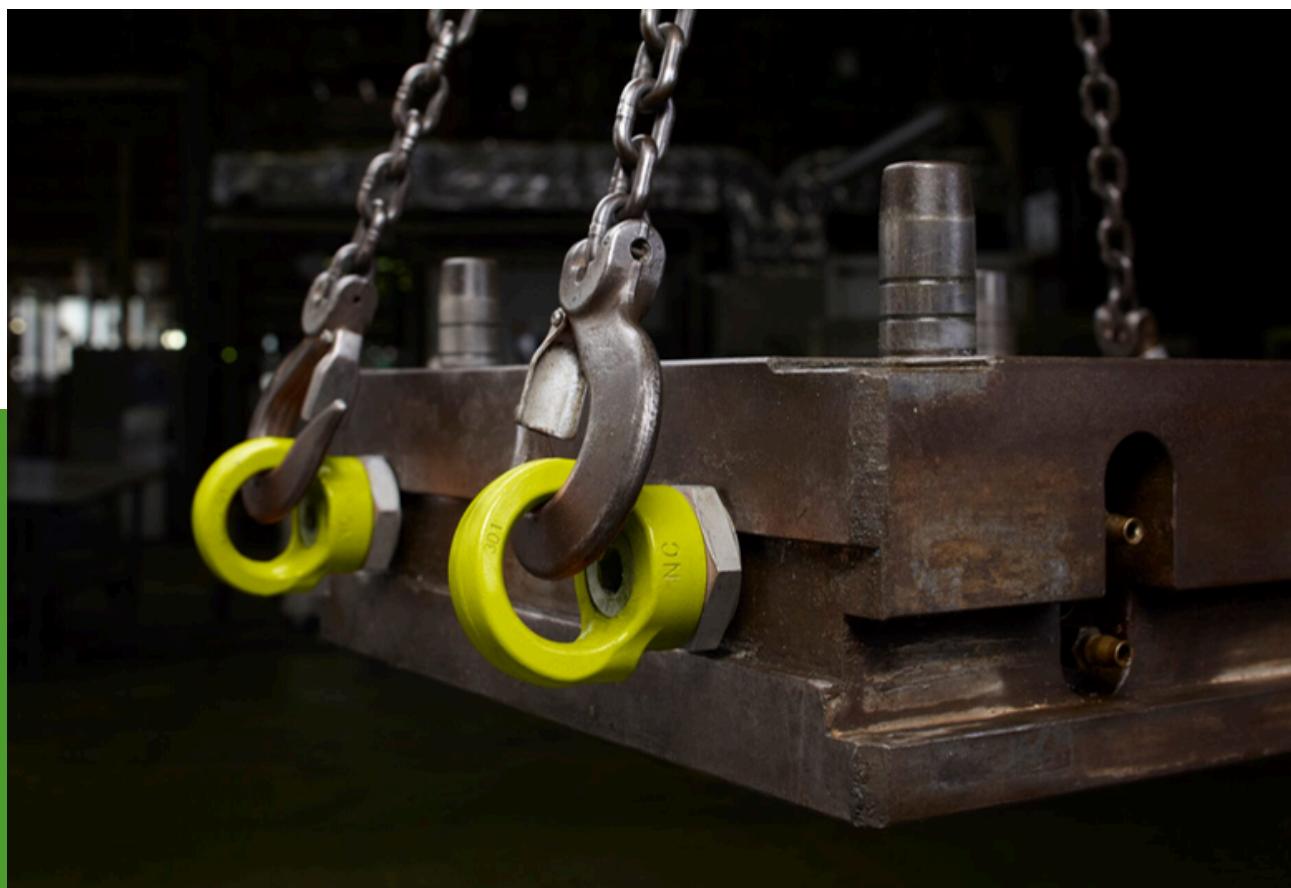

With access to the full GreenPin range and special orders from Crosby, we can supply the right solution quickly and reliably.

Lifting points

Technotex supplies a wide range of lifting points from trusted brands Gunnebo and JDT. This allows us to offer solutions for a variety of lifting applications, from standard to specialized needs. Customers benefit from the quality, safety, and reliability that both Gunnebo and JDT products provide. Our team can advise on the correct lifting point for each application, ensuring optimal performance and safety.

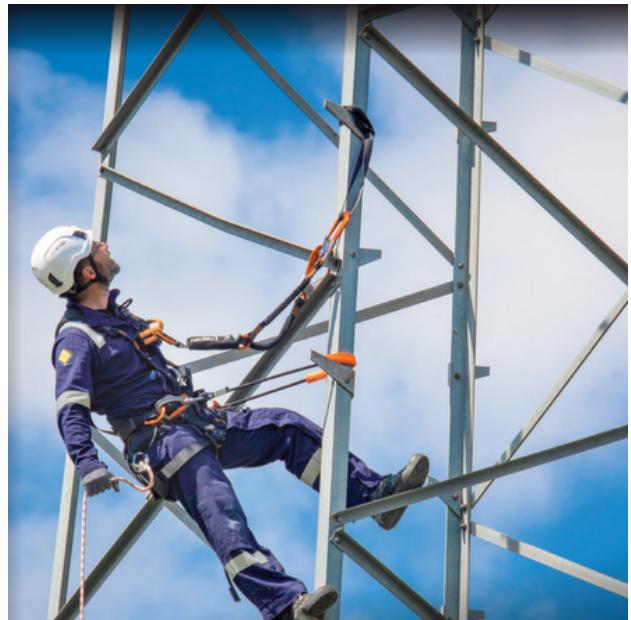

With access to the complete product ranges, we can supply the right solution quickly and efficiently.

Height Safety

Technotex offers the NeoFeu range of height safety products for reliable fall protection in demanding environments. The program includes harnesses, lanyards, and accessories designed to ensure maximum safety, comfort, and usability. NeoFeu products are tested to meet strict safety standards, providing peace of mind for every working situation at height.

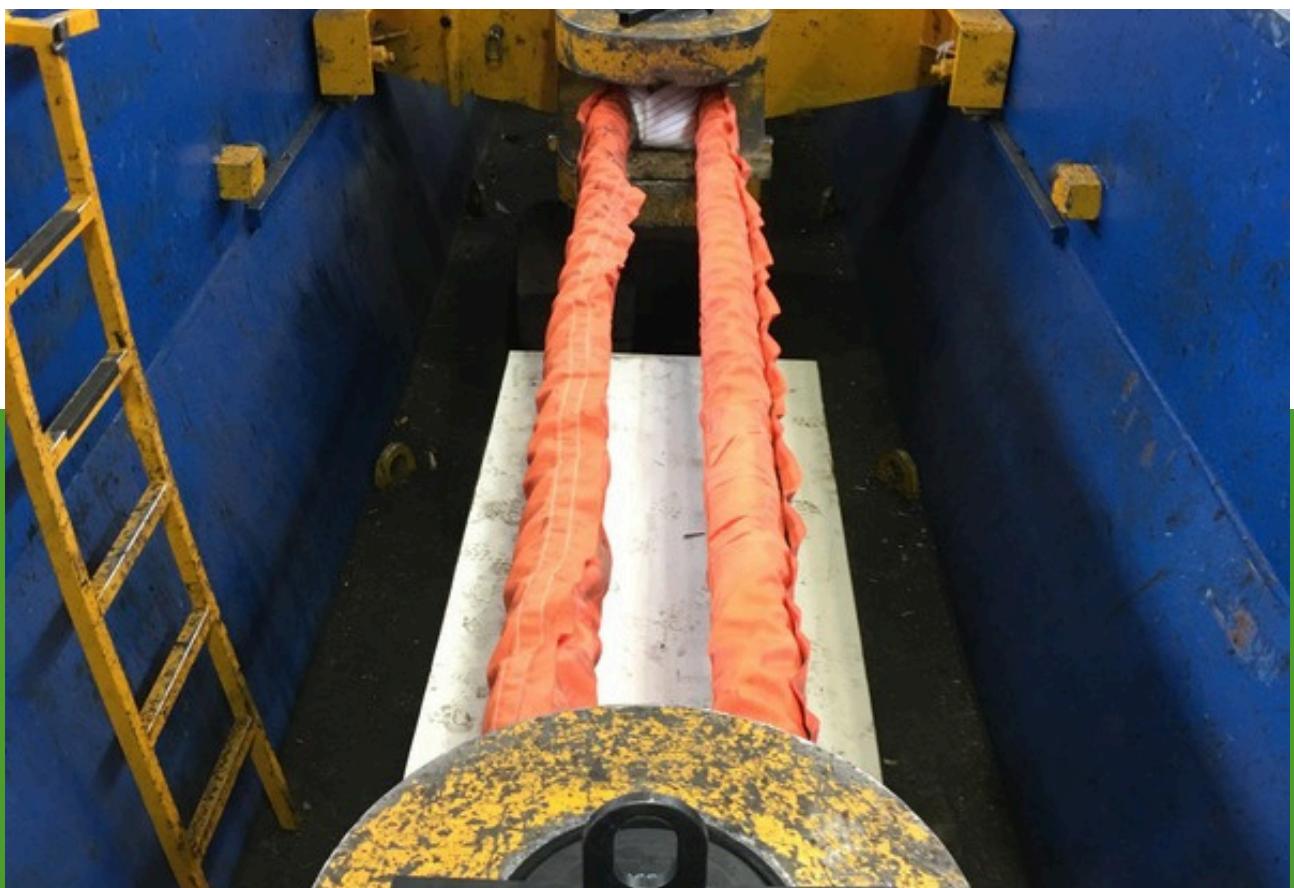

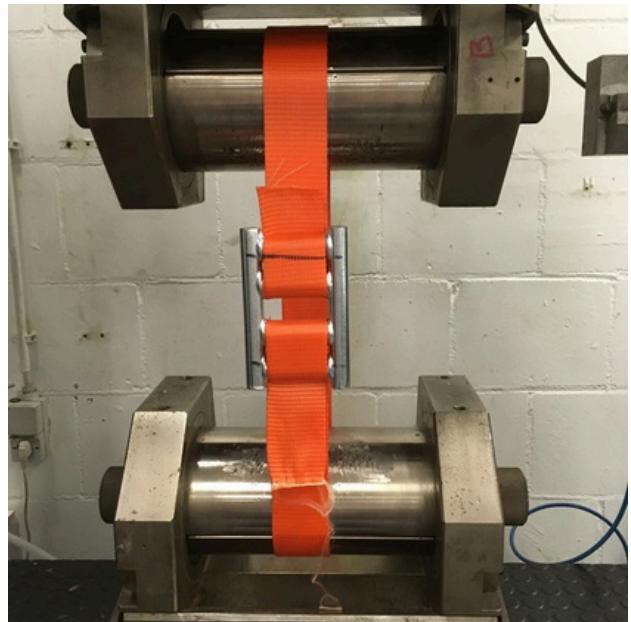

Our team can advise on the most suitable solutions for each application, helping to create a safe and compliant working environment.

Testing & repairing

Technotex provides extensive testing services for lifting and load securing equipment. This includes regular inspections as well as destructive testing to determine breaking strength, with test results available on request. In selected cases, we are also able to carry out repairs on round slings to extend their service life.

Our testing and repair services help ensure safety, compliance, and continued reliable use of equipment.

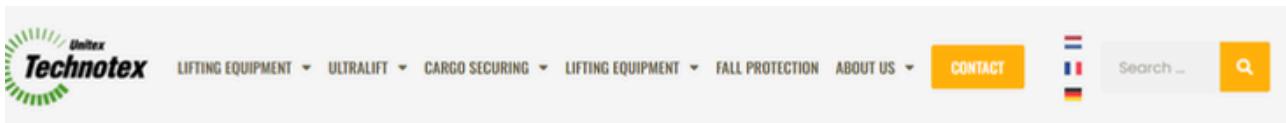

Datasheets

Technotex provides detailed datasheets for all our products, available on each product page at www.technotex.nl. These datasheets contain all the technical data required to make informed decisions, including working load limits, dimensions, materials, and compatibility information. Whether you are selecting webbing slings, round slings, buckles, tensioners, or other equipment, the datasheets provide clear and precise specifications.

They are designed to help you choose the right product for your specific application and ensure safe and efficient use.

The image shows a detailed product datasheet for 'W550 ONE-WAY WEBBING W550 50MM 5000KG'. The top features the Technotex logo and a small image of an orange strap. The main content is organized into sections: 'Specs' (Material: Polyester, Breaking strength: 5000 daN, Width: 50mm, Colour: Orange with print, Print: Standard and customizable on request, Packaging: 200m/bag - 12 bags/pallet), 'Combinations' (Strapping buckles, Lashing buckles, Lashing hook, Manual tensioner, Pneumatic tensioner), and a table for 'Lashing buckles' (B5050, B5050W, H5050). At the bottom are contact details: +31 80024 - 515 114, sales@technotex.nl, and www.technotex.nl.

The image shows the header of the Technotex website. It features the Technotex logo, a navigation menu with links to 'LIFTING EQUIPMENT', 'ULTRALIFT', 'CARGO SECURING', 'FALL PROTECTION', 'ABOUT US', and 'CONTACT'. There are also links for 'Search' and the European Union flag.

Greener future

At Technotex, we combine high-quality lifting products with a commitment to sustainability and safety. This catalogue is printed on Bio Top 3 paper, a fully recyclable and biodegradable material free from chlorine and optical brighteners.

We also support a circular economy by offering responsible recycling of decommissioned lifting equipment, reducing waste and transport emissions. Together with our customers, we strive for more reuse, less waste, and a lower carbon footprint. Every step we take is aimed at a cleaner and more sustainable future.
